PROTIME RK TRANSPONDER

Protime RK Transponder

- Ecological – Not disposable
- Interchangeable battery
- 5 years autonomy
- The detection is done up to 120 km/h
- No need to charge

Description

The Protime RK transponder is recommended for rental karting. No maintenance is necessary because this transponder is delivered with a Lithium-ion battery that lasts for 5 years.

An "active" loop is required to activate the transponder.

The battery charge level is sent to the decoder when the transponder passes over the loop.

Features

Lithium-ion battery :

- Autonomy : 5 years

Specifications

- Emission : magnetic induction
- Maximum speed : 120 km/h (75 mph)
- Maximum height of detection : 0,50 m (2.00 ft)
- Temperature range : - 20 °C to + 70 °C (- 4 to 158 °F)
- Dimensions (with Lithium-ion battery) : 65 X 44 X 22 mm (2.6 x 1.7 x 0.9 in)
- Weight : 80 g (2.8 oz)

The height of detection transponder depends on :

The disturbance signal in the loop (Noise)

The length of the loop (16 to 82 ft)

The width of the loop (increasing the width, increases the height of detection and vice versa)

The sensitivity level of detection (0 is the highest sensitivity)
